

PROFILE - SUMMERY

I'm a passionate engineer with a strong education and hands-on experience. I love solving problems and coming up with innovative solutions. I've worked on various projects before and am eager for new challenges to learn and grow. With my analytical skills and collaborative mindset, I excel in dynamic environments and contribute to project success.

LANGUAGE SKILLS

Swedish - English

PERSONAL SKILLS

Creative
Hands-on Experience
Hard worker
Structured and Organized

AYMAN ALZEIN

Control and System engineer

Portfolio: www.aymanalzein.com
Technical articles - Engineering projects - Hobbies

INDUSTRIAL EXPERIENCE

Model-based development - Control design - Sensor fusion - Robotics - Automation and PLC – Embedded Systems - Automotive diagnostics - Test and Validation.

EDUCATION

Chalmers University, Gothenburg, January 2025
- MSc System, Control and Mechatronics.
- Bachelor, Automation and Mechatronics.

WORK EXPERIENCE

Volvo Cars, Automation test lead 1/2025 - Ongoing
Developing an infrastructure for an automated testing environment that replicates the final vehicle assembly production flow, enabling validation of software releases and the SW production before deployment to the factory. The automation encompassed preparation of test objects, execution of tests, log management, and presentation of results.
The role required a strong understanding of complete vehicle systems and automation experience, along with expertise in diagnostics.

Satcube, Thesis student, 8/2024 – 1/2025
Developed a prototype antenna system for continuous satellite tracking on moving vehicles. Built a full Simulink simulation environment, modeled system dynamics, and designed control and sensor fusion algorithms. Validated simulations on a prototype implementation.

Chalmers formula student, Project Engineer, 10/2023 – 10/2024
Responsible for self-driving car electronics (IMU, LiDAR, Computers, Telemetry, Ethernet/CAN, Remote Emergency Systems).

SOFTWARE SKILLS

- Modeling and simulation: *Matlab, Simulink, Simscape*
- Mechatronics: *LabVIEW, ROS.*
- SW development: *VS Code, Git, Docker*
- Programming languages: *Python, Java, C, FreeRots.*
- Volvo's: *DSA, Parallel diag, GradeX, SiiG, OneEngine, CarFlow, ReVi, AutoTester, AutoVBFdownloader.*
- Others: *Catia V5, Cura, Circuit Lab.*

SELF TAKEN COURSES

- Safety when working on and in Electric Vehicles. University West, Trollhättan.
- EMC in Automotive. EMC services, Gothenburg.
- LabView. LinkedIn academy.
- 3D printing and laser cutting. Case Lab, Gothenburg
